**Impact Santé Afrique (ISA)** is an African non-governmental organization based in Cameroon, led and coordinated by young women. Our programs are mainly in Africa.

## Our goal

Contribute to the improvement of people's health through the implementation of transformative and sustainable programs that will save lives.

## Why ISA

The time has come to **catalyze a new movement from Africa for greater ownership of health issues.**

We must work together to:

- **Ensure** that all populations, including the most vulnerable, have access to health care and health services.
- **Reduce** maternal and infant mortality rate
- **Accelerate** the fight against malaria and other pandemics and include gender-sensitive solutions
- **Increase** domestic financing for health
- **Place** communities at the center of health programs

## Our main areas of intervention

- Advocacy
- Strategic communication
  - Technical assistance for Civil Society Organizations and countries
  - Social mobilization
  - Strategic partnerships

## The CS4ME project

One of Impact Santé Afrique first missions in the fight against malaria was to co-create and establish **CS4ME** (Civil Society For Malaria Elimination), the first global platform of Civil Society Organizations (CSOs) active in the fight against malaria. A network with more than 160 members from Africa and South Asia. CS4ME is a call for significant engagement of CSOs and communities to transform the fight against malaria.

**Join us and together, let's accelerate the fight to eliminate malaria!**
